24	QUARTERLY AVERAGE OF DAILY HQLA²	98,788,874,258	

¹ The quarterly average of monthly observations is based on January to March 2023 month end figures.

² The quarterly average of daily HQLA is based on January to March 2023 month end figures.

Comments

LCR requirements and movements

In accordance with the Bank of Mauritius Guideline on Liquidity Risk Management, banks are required to maintain a minimum liquidity coverage ratio (LCR). The LCR's objective is to ensure that banks have an adequate stock of High Quality Liquid Assets (HQLA) to meet their 30 day liquidity requirements under a stress scenario. The current regulatory minimum LCR requirement is 100%.

AfrAsia's average LCR for the quarter ending 31 March 2023 stood at 227% (346% for Q/E December 2022), driven by an excess HQLA stock of MUR 55.2bn over its total net cash outflows (NCO). The main drivers of the LCR are:

- (i) Movements in HQLA stock;
- (ii) Movements in customer loans and deposits;
- (iii) Interbank borrowing and funding;
- (iv) Contingent funding obligations;
- (v) Derivatives cash flows falling within the 30-day horizon.

HQLA stock and components

The bank's HQLA stock is made up of cash, including unrestricted balances with Central Bank (as aligned to the revised Cash Reserve Ratio framework, effective 31 January 2023), government and central bank securities and highly liquid qualifying investment grade corporate bonds.

The bank's monthly simple average HQLA stock over the Q/E 31 March 2023 was MUR 98.8bn.

As at 31 March 2023, the bank's HQLA stock position was MUR 108.2bn, made up of cash and unrestricted balances with Central Bank MUR 4.4bn (HQLA 1), Government of Mauritius and Bank of Mauritius Securities MUR 20.6bn (HQLA 1) and FCY Government Securities MUR 83.1bn (HQLA 1).

The bank calculates and reports LCR for MUR, its material foreign currencies (USD and EUR) and on a consolidated basis, fortnightly to the Bank of Mauritius. The bank's excess USD denominated HQLA stock is used to cater for the LCR requirements of its other material foreign currencies. The bank also has access to the swap market for its short-term currency mismatch requirements.

Funding mix and concentration monitoring

The bank's funding sources are mainly in the form of customer current, savings and term deposit accounts from global business companies, multi-nationals, financial institutions and individuals. Funding concentration risks are regularly monitored through internally developed metrics and the bank's funding strategy is aligned to its asset funding requirements.

Liquidity Risk Management framework

The bank's liquidity risk management principles are guided by its Liquidity Risk Policy and the Bank of Mauritius Guideline on Liquidity Risk Management.

Liquidity and funding risks management are the responsibility of the bank's Asset and Liability Management (ALM) team which is also responsible of ensuring tactical excess liquidity deployment and balance sheet optimization. The ALM team assists management by monitoring liquidity and funding risks on a daily basis and providing a comprehensive set of reports on a monthly basis to the Asset and Liability Committee (ALCO) to facilitate strategic decision making.

The Treasury Fixed Income and Liquidity Management desk is responsible for the operational aspect of daily liquidity management by ensuring short-term cash and funding requirements are met.
